profile

I'm an interaction designer who's passionate about expanding the intersection of art and technology. I am always searching for the right way to speak with people in new and profound ways through the work I do.

I'm searching for an in-house position as an interaction or product designer where I can grow, contribute, and change lives.

interests

I love to stretch myself beyond my work. I enjoy playing music, watching concerts, backpacking, skiing, and even skydiving. When I need to relax, I like to take photos, sketch, and paint.

- InVision
- HTML / CSS
- Javascript
- Ruby
- Git

experience

2016

Lead Designer — Table

At Table, I directed the design of both the product and brand prior to, and after the launch. I also was a primary developer of the mobile app, and hired a design team.

2015

Visual Designer — Poll Everywhere

At Poll Everywhere, I worked with the visual and experience design of the product across the mobile, desktop, and web apps. As part of the team, I helped drive more than 2x growth in both revenue and users.

I also created voting pages and visualizations for enterprise clients such as Google, Dell, IBM, and HP.

Web Designer — Nyentek

At Nyentek, I designed and developed websites and apps for various clients.

2014

Co-Founder — UserBallot

At UserBallot, I primarily focused on the design of the product and the brand.
